PL 00019/0108	Warner Lambert (UK) Limited	Remegel Plus	Activated Dimethicone 125-000 mg Calcium Carbonate 800-000 mg	For the relief of acid indigestion, heartburn, and of associated stomach upsets (dyspepsia), flatulence and cructation (belching and burping). General Sales List	14th February 1996
PL 00022/0169	Pharmacia Limited	Cabaser Tablets 1 mg	Cabergoline 1-000 mg	For the treatment of symptoms of Parkinson's disease, as adjuvant therapy to levodopa plus dopa-decarboxylase inhibitor, in patients affected by "on-off" mobility problems with daily fluctuations in motor performance. Controlled clinical studies have demonstrated that cabergoline administered once daily at an average dose of 4 mg/day following titration (up to 5-6 mg/day in the different studies) is effective in decreasing daily fluctuations in motor performance in Parkinsonian patients receiving levodopa/carbidopa therapy. Improvement of motor deficit has been demonstrated, while substantially decreasing the levodopa/carbidopa dose. Prescription Only Medicine	14th February 1996
PL 00022/0170	Pharmacia Limited	Cabaser Tablets 2 mg	Cabergoline 2-000 mg	(See PL00022/0169) Prescription Only Medicine	14th February 1996
PL 00022/0171	Pharmacia Limited	Cabaser Tablets 4 mg	Cabergoline 4-000 mg	(See PL00022/0169) Prescription Only Medicine	14th February 1996
PL 00031/0452	Roche Products Limited	Neupogen	Filgrastim 300 mg	For the reduction in the duration of neutropenia and the incidence of febrile neutropenia in patients treated with established cytotoxic chemotherapy for non-myeloid malignancy and for the reduction in the duration of neutropenia and its clinical sequelae in patients undergoing myeloablative therapy followed by the bone marrow transplantation. Neupogen is indicated for the mobilisation of autologous peripheral blood progenitor cells alone, or following myelosuppressive chemotherapy in order to accelerate haematopoietic recovery by infusion of such cells, after myelosuppressive or myeloablative therapy. In patients, children or adults, with severe congenital, cyclic, or idiopathic neutropenia with an ANC of $\leq 0.5 \times 10^9/L$ , and a history of severe or recurrent infections, long term administration of Neupogen is indicated to increase neutrophil counts and to reduce the incidence and duration of infection-related events. Neupogen is indicated in patients with advanced HIV infection and neutropenia (ANC $< 1 \times 10^9/L$ ) to allow schedule dosing of myelosuppressive medication. Prescription Only Medicine	29th February 1996
PL 00032/0203	Upjohn Ltd	Caverject Powder for Injection 10 micrograms	Alprostadil 10-000 mcg	For the treatment of erectile dysfunction in adult males. Caverject may be a useful adjunct to other diagnostic tests in the diagnosis of erectile dysfunction. Prescription Only Medicine	8th February 1996
