00106/0001	Edinburgh Pharmaceutical Industries Limited	Beclomethasone Dipropionate Inhaler 50µg	Beclomethasone Dipropionate 50 000 mcg	Beclomethasone dipropionate given by inhalation offers preventative treatment for asthma. It provides effective anti-inflammatory action in the lungs without the problems of systemic corticosteroid treatment. Beclomethasone Dipropionate Inhaler 50 micrograms is indicated in the prophylactic management of mild, moderate, or severe asthma in adults or children. Mild asthma: Patients requiring symptomatic bronchodilator asthma medication on a regular basis. Moderate asthma: Patients with unstable or worsening asthma despite prophylactic therapy or bronchodilator alone. Severe asthma: Patients with severe chronic asthma and those who are dependent on systemic corticosteroids for adequate control of symptoms. Many patients who are dependent on systemic corticosteroid for adequate control of symptoms may be able to reduce significantly, or eliminate, their requirement for oral corticosteroids when they are transferred to high dose inhaled beclomethasone dipropionate.	6th September 1996
00106/0002	Edinburgh Pharmaceutical Industries Limited	Beclomethasone Dipropionate Inhaler 100µg	Beclomethasone Dipropionate 100 000 mcg	(See PL/00106/0001) Prescription Only Medicine	6th September 1996
