From Tuesday October 2. to Saturday October 6. 1716.

Genoa, September 22.

ON the 18th came to an Anchor in this Port four French Gallies, under the Command of the Chevalier de Langeron, which 'tis said are to proceed to Leghorne as soon as the Weather will permit; and they are extraordinarily manned, having double the Number of Marines usual; 'tis not known what the Design of their Voyage is, but 'tis said they are to be followed by 4 other Gallies. 'Tis advised from Tripoli, that Admiral Baker with a Squadron of 5 British Men of War arrived there on the 13th of July, and had renewed the Peace in the Name of the King of Great-Britain, including His Majesty's Subjects on the Island of Minorca.

Stockholm, Aug. 7. On Sunday the 5th Instant an Express arrived here from Oregrunds, a small Sea-Port about 30 Leagues to the Northward of this Place, with an Account that on Friday last about 10 a Clock at Night, 6 or 7 small Muscovite Gallies came unperceived into that Road from Aland, and landed immediately about 150 Men, who seized about 20 Men of the Town, and after an Hour's stay retired, without doing any other Injury to the Inhabitants, who are most of them Fishermen, and serve for Pilots in the Bothnick Gulph; from which 'tis apprehended, that the Design of the Muscovites in carrying off those People, is to make use of them as Pilots in their intended Descent from Finland. This Attempt causes a great Consternation all along the Coast, so that many Families have already abandoned their Dwellings, and are removing up into the Country. Upon this News General Taube, who commands the Army in these Parts, dispatched an Express to the King, to desire that the Regiments of Infantry of Upland, Helsingland and Buckler's, which his Majesty lately directed to march from the Northward to Schonen, and are now advanced into this Neighbourhood, might be left here. All the Finnish Troops which retired out of that Duchy about two Years ago, and have since been quartered in Helsingland, and are yet computed at about 2000 Horse and 2500 Foot, came last Week into Upland the Province adjoining to this City, so that all the three Provinces on this side the Bothnick Gulph, as far as the Town of Gasse, are now entirely destitute of Troops. There is yet no Camp formed in this Neighbourhood for the Defence of this City; nor hath the King hitherto declared what Regiments shall continue hereabouts. But if the three abovenamed pursue their March to Schonen, there will then be remaining in these Parts only about 1200 Horse and 2500 Foot, besides the Finlanders. The Letters from Schonen say, that by the Middle of this Month the Army in that Province will amount to 10000 Horse and 8000 Foot, besides the Garrisons; and there are still on the march thither about 4000 Foot and 1500 Horse. By the Advances from Crona the Swedish Fleet is taking in 6 Weeks Provisions more; and 'tis said it will put to Sea again by the Middle of this Month; though its Strength is still only 16 Ships of the Line, and 4 Frigates.

Copenhagen, Oct. 3. The Preparations for the intended Descent on Schonen having been protracted several Weeks beyond the Time proposed when that Project was first formed and agreed on; by which Means not only the Season is too far advanced, but the Swedes have drawn together a considerable Army in Schonen, secured all the Posts, and removed all the Forrage and Provisions from the open Country into the strong Towns; and there not being sufficient Magazines provided here, for supplying such a Number of Forces in an Enemy's Country and in the Winter, as were designed, and necessarily must have been transported from hence; it has been resolved after mature Deliberation, to defer that Enterprize to a more proper Season. In the mean while the Muscovite Troops are all embarked here, in order to be carried to Winter Quarters; but in what Parts they are all to be disposed, is not yet intirely settled. Frequent Conferences are held between the Danish and Russian Ministers. Sir John Norris with the British and Dutch Squadrons, will in a little Time go up the Baltick, to secure the Return of the Trade. The Czar has intimated that he designs to go to Holland, proposing to have an Interview with the King of Great-Britain in his Way thither.

Hanover, Oct. 6. The King designs to set out for Goor on the 10th Instant; which Day is also fixed for the Departure of the Queen of Prussia to return to Berlin. The freshest Letters from Warsaw, which are of the 25th of September, do not bring any thing certain as to Peace or War in that Kingdom: The Confederates had again sent Deputies to the King, and the Conferences were to be renewed on the 26th; but at the same Time General Bosen with 6000 Saxons was marching with all Expedition, in order to attack M. Gniadowski at Thorn. Mr. Whitworth sets out on the 12th Instant to return to the Court of Berlin.

Brussels, Oct. 5. The 1st Instant being the Emperor's Birth-day, the same was celebrated here with the usual Ceremonies, and by a triple Discharge of the Cannon and small Arms of the Garrison both at Noon and at Night: In the Absence of Count Kinigslegg the Imperial Minister, who has been for some Days past in the Country, Count Vehlen, Commander in chief of the Troops, attended by a great Number of Officers, assisted at the solemn Service performed in the Cathedral Church on that Occasion. One of the Marquess de Prie's Secretaries arrived here Yesterday: He brought his Imperial Majesty's Instructions to Count Kinigslegg for his Embassy to the Court of France; and his Excellency's Equipage is preparing, in order to his setting out immediately after the Marquess de Prie's Arrival at this Place. Letters from Ghent advise, that two of the Deputies of Flanders set out from that Place on the 2d Instant for the Hague, viz. M. Triest d'Aughem, first Secretary of that Town, and M. Cordonnier one of the Pensionaries of Bruges: 'Tis said that Baron Pottalsberg de Boulancy is deputed in behalf of the Clergy; but his Imperial Majesty's Letter to the States of Flanders, authorizing them to send only two Deputies to the Hague,
