Vienna, August 28. THE last Letters from the Imperial Camp are of he 20th Inftant, and give us a more grade than that which was brought by Count Ra-butin. They fay, that on the butin. They fay, that on the 17th about Noon, the Garrifon hung out a white Flag and defired to capitulate, but as they infifted upon fome Demands, efpecially upon keeping their naval Armament, the Imperialists began their firing again upon the Town. However, the next Day in the Morning there was a Parley between them and the Tuskish Deputies, and the latter were told very plainly what Terms they were to have, and had an Hour given them to confider of them. Thereupon the Capitulation was figned the fame Day, and on the 19th three Battallions took Poffeffion of a Gate, and 20 Companies of Grenadiers and 12 Battallions entred the Town and took Poft in the Outworks. They began likewife to take an Account of the Artillery, and to fet Guards at the Magazines, which they continued doing the aoth. They had then found, in the Town 115 brafs Guns and 40 Mortars; in the Island and on board the Shipping, 77 Brais and 111 Iron Guns; and in the Camp 135 fine brais and 111 fron Guns; and in the Camp 135 fine brais Guns, and 37 Mortars; befides which they expected to find fill more as they wention in their Search. The Capitulation being figned, Prince Eugene had Te Deum fung very folemnly in the Grand Vizier's Tent, which was adorned with Trophies taken among the Spoils of the Enemy.

On the 20th the Garrison delivered up the Pri-foners and Deferters, among which latter was found a Sicilian Knight of Maltha who had been already circumcifed.

The Prince has ordered the Regiments of Ba-greith, Schonborn, Paté, Hautois, Mercy, and Graven to be in a Readiness to march, and to join near Panzova the Regiments of Montecuculi, Sultzbach, and five Regiments of Huffars. It is believed this Detachment is to be commanded by Count Mercy and to attack Orfova, which is a Place of great Confequence for the Security both of Temeswaer and Belgrade, as well as for the Freedom of the Danube, on the Side of which it stands, and Part of it on an Island in that River. That Situation makes it ftrong, however it is not expected to meet with much Relifiance there after this total Defeat. When the Prince has made himfelf Mafter of that Place, it is supposed he will put his Army into Winter-Quarters in the Kingdom of Bolnia, which is a rich and fertile Country.
