Kensington, August 12.

AN Humble Address of the High Sheriff, Justices of the Peace, and the Grand Jury of the Body of the County of Suffolk, met at the Assizes for the said County on the 5th of August, 1718. has been presented to His Majesty by Thomas Betts, Esq; one of His Majesty's Justices of Peace for the said County, and Fore-Man of the said Grand Jury, introduced by the Right Honourable James Craggs, Esq; one of His Majesty's Principal Secretaries of State

Which Address His Majesty was pleased to receive very graciously.

Genoa, Aug. 6. The Burford Man of War, Captain Vanbrugh Commander, arrived here the 30th past from Port Mahon, having left the British Fleet commanded by Sir George Byng under Sail, being bound from thence to Naples; the Captain sent on Shoar a Packet for the Governour of Milan, which was immediately forwarded by an Express, and the first Instant this Ship put to Sea again in order to rejoin the Fleet. That Day two French Vessels came in here laden with Corn; Three Feluccas arrived likewise in our Port from Messina, one of which had on board the Lady of the Governour of that Place, and her Retinue. They give an Account, that the Garrison was very well provided with all Necessaries, and was resolved to defend it self to the last Extremity.

Madrid, Aug. 8. The Queen of Spain being recovered of a Fever, which had confined her to her Apartment, has gone abroad these two Days to take the Air. The 3d Instant an Express arrived at the Escorial with Letters from Palermo of the 14th of the last Month, giving an Account, that the Garrison of the Castle A Mare adjoining to that City, which notwithstanding its Weakness, and the bad Condition of the Fortifications, held out ten Days, surrendered that Morning, after the Besiegers had made two Breaches, both passable. The said Garrison insisted upon being allowed to march out with the usual Marks of Honour, but the Marquis de Lede would allow them no other Terms, than that they should surrender at Discretion, and become Prisoners of War, which they were obliged to submit to; and Orders were given for transporting them, part to Barcelona, and the rest to Alicant. These Letters add, that a Number of the Country People, incited by the Spa-

niards, being got together, had attempted to oppose Count Maffey the Viceroy's Retreat to Messina, having for that Purpose possessed themselves of a difficult Pass that lay in his Way, but that he disappointed them by taking a different Road. The Earl Stanhope is daily expected here from Bayonne, whither a Pass was sent him eight Days ago from his Catholick Majesty. The Council of the Hazienda, or Treasury, was extraordinarily assembled the 5th of this Month, and was made acquainted, that the King has appointed one and twenty Surveyors, and as many Accountants, for the collecting of his Revenues in the several Provinces of his Dominions, not excepting Navarr, Biscay, Guipuscoa and Alava, which will prove a great Mortification to the Inhabitants of the Countries abovenamed, who have hitherto enjoyed the Privilege of raising the publick Money within their Limits, by Officers of their own choosing. These Surveyors and Accountants are ordered to repair to the respective Districts allotted them, before the first of September, and are said to be charged with very voluminous Instructions containing several Articles calculated for the Improvement of the Revenue. The Resolutions of the Council of Castille, with regard to the Differences between this Court and that of Rome, are not yet made publick. Orders are sent to the Council of the Indies to take Care; that for the future four Advice-Boats be regularly dispatched every Year to Peru, one in January, another in March, the third in June, and the fourth in November, to the end we may get better Intelligence than we have hitherto had, of what passes in those Parts.

Berne, Aug. 19. This State being informed that the new coined French Crowns are made current in France much above their intrinsic Value, has issued out a Proclamation, strictly prohibiting throughout this Canton the receiving of that Coin, on the Penalty of Confiscation. The Pope's Nuncio at Lucern has had a Conference with the Abbot of St. Gall, to dissuade him from ratifying the Treaty of Baden: But that Prelate being very desirous of entering into Possession of his Convent and the Territories belonging to it, would not be prevailed upon to break his Promise of ratifying the said Treaty, and we have this Day received Advice from Zurich, that his Ratification is actually arrived there.

there, to be exchanged for those of the two Cantons.

Brussels, Aug. 15: The Convention lately made between the Emperour, the most Christian King, and the States General, against entertaining Deserters from each other's Troops, having been approved and ratified by the several Parties concerned, was read this Week at the Head of our Garrison, which had been drawn out for that Purpose. For the better preventing such Tumults as that which lately happened here, the Night-Watch has been augmented, and they have Orders given them to fire upon any Person they find making a Disturbance; Directions are also given for repairing forthwith the Fortifications of the Castle of Montefey that commands part of the Town, and for providing it with Ammunition, which will contribute to keep the Rabble in awe. The Sieur Nenny, who lately came to receive the Marquis de Prié's Instructions upon some Points relating to the Execution of the Barrier Treaty, and the settling of the Arrears depending between the Emperor and the States General, for what their High Mightinesses furnished during the War for the Defence of the Netherlands, is gone back to the Hague to carry on that Negotiation.

Paris, Aug. 20. The Abbot du Bois, Ambassadour Extraordinary from his most Christian Majesty to the King of Great Britain, returned hither this Week from London, and waited upon the Regent to give him an Account of his Negotiation, by whom he was received with particular Marks of Esteem, and of the Approbation due to his great Services. His Royal Highness has been ill of an Inflammation in his Eyes, but is perfectly recovered. Our Troops began this Day to march, in order to change their Quarters, which they usually do once a Year, and the Prince of Conti's Regiment of Horse being to pass by the Village of St. Denis near this City, the Regent intends in Person to review them. The Duke de Mombazon, Son to the Prince of Guimené, has lately married a Daughter of the Prince of Rohan. Our freshest Advices from Italy give an Account, that the British Fleet under the Command of Sir George Byng, arrived at Baia near Naples the 2d Instant, N. S. They write from Rome that the Count de Charolois was on his Departure from thence for the Elector of Bavaria's Court. Letters from Spain say, a very strict Order had been published to forbid the carrying of Horses and Mules out of that Kingdom. They add that their Trade was very much disturbed by Numbers of Privateers bearing the Emperour's Colours, who were come on their Coasts from Newport and Ostend, and had taken several Spanish Merchant Ships.
