CADENT GAS LIMITED (CADENT)
CADENT GAS LIMITED (CADENT) – HYNET NORTH WEST
HYDROGEN PIPELINE ("THE PROJECT")
SECTION 47 AND SECTION 48 PLANNING ACT 2008
REGULATION 4 INFRASTRUCTURE PLANNING (APPLICATIONS:
PRESCRIBED FORMS AND PROCEDURE) REGULATIONS 2009
REGULATION 13 INFRASTRUCTURE PLANNING
(ENVIRONMENTAL IMPACT ASSESSMENT) REGULATIONS 2017
NOTICE OF PUBLICATION OF STATEMENT OF COMMUNITY
CONSULTATION (SOCC) PUBLICISING A PROPOSED
APPLICATION FOR A DEVELOPMENT CONSENT ORDER ("DCO")
Have your say on Cadent's Hydrogen Pipeline proposals in the
North West that will transport low carbon hydrogen to industrial customers

Notice is hereby given that Cadent (the "Applicant") of Pilot Way, Ansty CV7 9JU intends to make an application to the Secretary of State for Business, Energy and Industrial Strategy (BEIS) under Section 37 of the Planning Act 2008 for development consent (the "Application").

Cadent is the UK's largest gas distributor and is currently developing a number of projects to support future hydrogen use across England and is the Applicant for this project.

The Project

The Project includes the construction, operation and maintenance of up to 125km of new pipelines to distribute hydrogen to industry, power stations and locations on the existing natural gas network in the North West, where hydrogen could potentially be blended with natural gas. The pipeline network would connect to a newly constructed Hydrogen Production Plant at the Vertex Hydrogen site, as the initial source of hydrogen for onward distribution through the network, as well as to a proposed underground Hydrogen Storage Facility.

A Central Hub connects the four main pipeline corridors that stretch across Cheshire, Warrington, parts of Merseyside and Greater Manchester in all four compass directions. Branching off from each main corridor there would be spurs - smaller pipelines - that provide connections to some of the customers identified as part of the Project. The pipeline would be buried below the ground along the entire route, apart from short sections within secure compounds at locations where Hydrogen Above Ground Installations (HAGIs) and Block Valve Installations (BVIs) are required.

A Section 35 direction has recently been provided by the Secretary of State for BEIS, which determines the Project's status as an NSIP. The Project comprises:

- an onshore network of new pipelines to transport low carbon hydrogen from a Hydrogen Production Plant in Cheshire, to industrial customers, and for potential blending into the existing natural gas network in the North West;
- a number of HAGIs and BVIs to allow sections of the pipeline to be isolated for maintenance;
- areas of mitigation, restoration and/or reinstatement; and
- further development to enable the construction of the Project, for example, construction sites, lay-down areas and site access.

The DCO application will also cover:

- operation and maintenance and decommissioning of the Project;
- the compulsory acquisition of land including rights in or over land required for the purposes of the Project, land required to facilitate or is incidental to the Project;
- the application and/or disapplication of legislation relevant to the Project including that relating to the compulsory acquisition of land; and
- further provisions, permissions or consents as are necessary and/or convenient.

The Project is an Environmental Impact Assessment (EIA) development as defined in the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017. Consequently, the Applicant will submit an Environmental Statement as part of the Application.

The Applicant has made initial environmental information available in the form of a Preliminary Environmental Information Report (PEIR) and a non-technical summary ("NTS") of the PEIR.

The Applicant has also prepared other reports, documents, plans and maps which show the nature, location and proposed extent of the Project.

The documents referred to will be available for inspection on the project website until 24 October 2022.

SoCC and public consultation

Cadent has published a Statement of Community Consultation (SoCC) for the Project, in accordance with Section 47 of the Planning Act 2008 (as amended). The purpose of this notice is to provide details of when and where the SoCC can be inspected, in accordance with Section 47(6)(a) of the Planning Act 2008.

The SoCC explains the public consultation Cadent intends to undertake and how people can comment on the Project.

The SoCC is available on our project website (www.hynethydrogenpipeline.co.uk) from 5 September 2022 and at the below reference locations in the project area from the start of, and for the duration of, our consultation (12 September to 24 October 2022). The reference locations provided have been the subject of consultation with relevant local planning authorities.

If you are unable to access the website, please contact the community relations team on **0800 860 6261** or via email to: info@hynethydrogenpipeline.co.uk.
