SOUTH WEST WATER LIMITED

STATUTORY NOTICE OF APPLICATION FOR DROUGHT PERMITS SECTION 79A OF THE WATER RESOURCES ACT 1991

TAKE NOTICE that due to a serious water shortage (or a threat thereof) in the Colliford Water Resource Zone ("WRZ") caused by an exceptional shortage of rain, South West Water Limited ("SWW") of Peninsula House, Rydon Ln, Exeter EX2 7HR is applying to the Environment Agency for two drought permits ("the Drought Permits") under section 79A of the Water Resources Act 1991.

Kennall Vale

SWW is licenced to abstract water from the River Kennall for public water supply under abstraction licence number 15/48/22/S/29 dated 1 June 1971 ("**the KV Licence**").

Under the KV Licence, SWW is allowed to abstract a maximum quantity of water from River Kennall of 54,552 cubic metres per day and up to 4,091,460 cubic metres per annum. When the flow in the River Kennall immediately downstream of the works is in excess of 0.065 cumecs, then up to 75% of this excess flow may be abstracted by SWW (subject to the maximum daily and annual abstraction limits). The drought permit application for Kennall Vale will involve a variation to the KV Licence until 31 December 2022 to allow SWW to abstract up to 100% of the excess flow (above 0.065 cumecs). The daily and annual abstraction limits as proscribed by the KV Licence will not be altered.

Restormel Water Treatment Works

SWW is licenced to abstract water from the River Fowey at the Restormel Water Treatment Works ("**WTW**") for public water supply under abstraction licence number 15/48/18/S/40 dated 8 April 1987 ("**the Restormel Licence**").

Under the Restormel Licence, SWW is allowed to abstract a maximum quantity of water from River Fowey of 110,000 cubic metres per day and up to 28,900,000 cubic metres per annum. The annual abstraction limit of 28,900,000 has been increased to a limit of 32,200,000 until the end of 2022 by way of a drought permit issued on 31 October 2022.

Under condition 2 of the Restormel Licence, when the flow in the River Fowey is above 1.207 cumecs, then up to 50% of this excess flow may be abstracted by SWW, except to the extent that water is released from Colliford or Siblyback Reservoirs. This abstraction is still subject to the maximum daily and annual abstraction limits.

The drought permit application for Restormel WTW will involve a variation to the Restormel Licence until 31 December 2022 to allow SWW to abstract up to 75% of the excess flow, above 1.207 cumecs. The daily abstraction limit and annual abstraction limit (as varied by the drought permit issued on 31 October 2022) will not be altered. The Drought Permits, if granted, will allow SWW to continue to abstract water from the River Kennall and River Fowey, with further volume available for public water supply, or to refill Colliford Reservoir directly.
