Bareith, August 13, N. S.

THIS Morning her Royal Highness the Margravine, lately returned from Carlsbadt, set out with a small Retinue for the Court of Berlin.

Nuremberg, Aug. 17, N. S. Baron Widman, and Mr. Burrish, the Imperial and British Ministers, accredited to the Circle of Franconia, returned hither on the 14th from Bareith, and are preparing to proceed in a few Days to the Court of Anspach.

Copenhagen, August 19. On the 16th the Queen of Denmark went to the Chapel Royal for the first Time since her Lying-in, and appeared afterwards in the Circle. It is expected that some considerable Promotions will be made before the Coronation; and it is said, that five or six blue Ribbons will be then bestowed among the Ministers of the Council and the Generals. We had Yesterday a very melancholly Account from a Place called Ringsted, eight Danish Miles from hence on the Road to Holstein, where, two Days before, a terrible Fire broke out, and burnt with such Violence, the Wind blowing hard at the same Time, that in a few Hours almost the whole Town was laid in Ashes. The Church and the Convent, together with about 20 poor Houses, are all the Buildings that have escaped the Flames. The Asiatick Company has resolved to send out this Year two Ships to Tranquabar, and two to Canton.

Florence, August 15, N. S. His Britannick Majesty's Ships of War continue to intercept a great Number of small Vessels loaden with Provisions for Genoa. Two Gallies of that Republick are detained at Leghorn, not daring to venture out. They were on their Departure, but received Orders by two Expresses from Genoa, not to leave Leghorn till further Notice.

Turin, Aug. 20, N. S. Letters from Vado Bay of the 5th Instant bring an Account, that Henry Medley, Esq; Vice-Admiral of the Blue Squadron of his Britannick Majesty's Fleet, died that Morning of a Fever, after nine or ten Days Illness, much regretted.

Bergen-op-Zoom, Aug. 29, N. S. A Sally was made Yesterday about One o'Clock, by which we destroyed some small Part of the Enemies Approaches, and killed them about a Dozen Men. The Fire was extreme hot for most Part of last Night, by which we lost several of our People.

Bergen-op-Zoom, Aug. 30, N. S. The French sprung a Mine last Night to ruin the Remains of the Lunette of Zealand. It is supposed they intend to erect a Battery of five Guns to batter the Ravelin Dedem. A Deserter reports, that their Companies are diminished from 40 to 18 and 20 Men.

Hague, Sept. 1, N. S. The Earl of Sandwich set out Yesterday Morning for the Army. General Smiffaert was carried off a few Days ago, in Zealand, by a malignant Fever: By his Death, which is greatly lamented, the Government of Boissleduc is become vacant, and is said to be intended for General Cronstrom. The French have not made of late any Progress in their Attacks against Bergen-op-Zoom; they seem to be quite at a Stand, at least above-Ground, and our Miners are hard at Work to defeat their Attempts under-Ground. The Body of Troops under the Command of General Chanclos, arrived at Oudenbosch the Night before last; and the Letters received this Day from Bergen-op-Zoom say, that General Chanclos had been there, and had found the Town in a much better State of Defence than he expected.

Rotterdam, Sept. 1, N. S. Advices from Bergen-op-Zoom continue very favourable: The
