From Saturday December 8, to Tuesday December 11, 1750.

*Petersbourg, November 20.*

**T**H E Swedish Minister having complained to this Court, a few Days ago, of some Irregularities being committed by the Russian Soldiers quartered on the Confines of Finland, her Imperial Majesty immediately sent Orders to the commanding Officer there, to make strict Enquiry into the Truth of these Complaints, and to punish severely all those who shall appear to deserve it. An Express is arrived at Court from M. de Nepleuf, our Minister at Constantinople, with Advice, that the Grand Vizier had acquainted the Foreign Ministers, by Order of the Grand Seigneur, with the Conclusion of a Definitive Treaty of Peace between that Court and Persia; declaring at the same Time, that the Grand Seigneur had taken this Step with no other View than to preserve the publick Tranquility; and that so far from having the least Design to break off the perfect Harmony which subsisted between the Porte, and the Courts of Vienna and Russia, he should use all possible Means to render it perpetual.

*Turin, Nov. 27.* On the 17th Instant, being the Birth-day of the Dutchess of Savoy, who then entered into the 22d Year of her Age, the Nobility, Foreign Ministers, and other Persons of Distinction, all in their richest Habits, repaired to the Venerie, to compliment her Highness thereupon; which made the Court very numerous and extremely brilliant. At Night the fine Fireworks, which had been for some Time preparing before the Palace, were played off with all the Success imaginable, notwithstanding it had rained almost continually for three Days together. By Letters from Nice we are informed, that the Corsairs of Barbary appear more numerous than ever in the Mediterranean, and that scarce a Day passes without their taking some Vessel or other belonging to the Christian Powers.

*Genoa, Nov. 28.* The Count de Sartirane, Envoy Extraordinary from the King of Sardinia, having notified his Arrival to this Government, a Deputation of four Gentlemen were sent last Saturday to compliment him thereupon in the Name of the Republick; and on Sunday he was admitted to his first private Audience of the Doge, to whom he delivered his Credential Letters. The Instructions this Minister received from his Court are, as 'tis said, to

adjust, in an amicable Manner, all Differences relating to the Limits of the two Countries; and to make some new Propositions for the regulating and establishing, upon a better Footing than heretofore, the Commerce which is carried on between the Subjects of the King his Master and this Republick. Letters from the Frontiers of Tuscany say, that the Overflowings of the Rivers, occasioned by the almost continual Rains, have done a great deal of Damage in those Parts; but we hope the next Advices from thence will prove more favourable, as the Wind is now come about, and the Mountains are almost covered with Snow. Since the Wind's coming about, it has blown for near a Week past a perfect Hurricane, and has greatly damaged the Shipping, upwards of twenty having been lost on the Western Coast of this State, besides what has been lost at Sea.

*Stockholm, Dec. 1.* The King has named Baron Nolcken to the important Post of First President of the Tribunal of Justice at Jenkoping, vacant by the Death of M. Cederholm; and M. Hammerberg is appointed Chancellor thereof, in the room of the said Baron Nolcken. His Majesty has also appointed Baron Scheffer to be Lieutenant-Colonel of the Regiment of Jempteland. The Distemper amongst the Horned Cattle having ceased in the Provinces of Upland and Sudermanland, the Prohibition, which was issued to prevent their being brought hither from those Countries, is taken off.

*Warsaw, Dec. 4.* On the 22d past, an Order was published by the Regency, commanding all Jews whatsoever to depart from this City, with their Effects, within the Space of 24 Hours from the Date thereof, which they all complied with.

*Vienna, Dec. 5.* Last Thursday their Imperial Majesties dined in Publick, when several Lords and Ladies were admitted to dine at their Table, agreeable to the new Regulation. General Baron de Breitlach, Ambassador from this Court to that of Petersbourg, and Count Esterhasi, Ambassador from hence to the Court of Spain, are both set out on their respective Embassies. 'Tis assured, that the Landgrave of Hesse Darmstadt intends passing the Winter at this Court. On the 30th past, being the Feast of St. Andrew, the Emperor held a Chapter of the Order of the Golden Fleece, in which Count Harrach, late Governor of the Milanese, was created a Knight of that Order.
