**T**HE Captain Bashaw is shortly to put to Sea with seven Men of War and twelve Frigats, in order to sail for the Islands in the Archipelago, to receive the annual Tributes which the Inhabitants of those Islands pay to the Grand Seignior. A few Days ago a Man of War of 100 Guns was launched in this Port.

*Lisbon, May 10.* The Fleet from Rio de Janeiro arrived at the Mouth of the Tagus on Wednesday last, having had a safe and quick Passage. This Fleet is reckoned the richest that has come from that Country for some Years past.

*Pofnania, May 18.* Count Dzialinsky, Patin of Kalisch, is appointed Commissary General of the Troops of this Republick, in which Quality he has, by the King's Order, made a general Review of all the Regiments, who went through their Exercise with great Exactness, and made a handsome Appearance.

*Prague, May 29.* Several Persons are committed to Prison as the supposed Authors of the late great Fire, but as yet nothing of that Nature has been proved against them. By an exact Account taken of the Number of Houses destroyed and damaged on that Occasion, they amount to no more than 360.
