WINCHESTER RACES.

ON Tuesday the 20th Day of August will be run for on Worthy Down, his Majesty's Plate of One Hundred Guineas, by any Horse, &c. no more than six Years old last Grass, carrying twelve Stone, according to the usual Rules and Articles of his Majesty's Plates: Any Disputes arising to be determined by his Grace the Duke of Bolton, or whom he shall appoint.

By the KING's PATENT.

HIS Majesty having been graciously pleased to grant His Royal Letters Patent, bearing Date at Westminster the 21st Day of May 1754, unto John Lewis, Merchant, in Plymouth, for his new invented Varnish of Pine, prepared from the Glutinous Juices of the American Pitch Pine Tree, proved by many Experiments made in His Majesty's Dock Yards, and many other private Docks, to be the cheapest and best Preparation for Paying Ships Sides and Masts, and for preserving Ships and Timber Buildings from the Weather, from the Worm, and from Decay of any Thing yet known. It is very tenacious and penetrating, and intirely free from that saline acid Water which is found in Turpentine in great Quantities; it will never turn White after Rain, but continues always of a bright Amber Colour, and very transparent; it must be laid on gold with a Brush, which may be done at Sea as well as in Harbour; and is of the Consistency of Linseed Oyl, boiled down very thick, and quite as smooth.—One Hundred Weight is sufficient to pay the Sides and Masts of a Ship of 250 Tons: This is therefore to acquaint the Publick, that the said Varnish is sold by the Patentee at Plymouth, and by Mr. Alexander French, Ship-Chandler, at Rotherhith.

IN the Year 1752 I was called to a Girl about eighteen Years of Age, by her Father, who told me she had lost her Speech twenty-four Hours. I found the Girl had no perceptible Pulse, and I could but just perceive her to breathe, except sometimes when she fetch'd a deep Sigh. Her Eyes were fixed, and her Extremities cold. In this deplorable Situation, I endeavoured to get down some of Dr. James's Fever Powder, mixed with a little Treacle. After several Attempts, she took the Quantity of a Quarter of a Paper. I found that in half an Hour she grew warmer, I could just perceive a Pulsation at the Wrist, and she breathed with Difficulty; soon after this she moved her Eyes, and in less than an Hour puk'd once, and then asked to drink. I gave her some Gruel, and half a Paper more of Powder (her Pulse was at this raised and quick). After taking this Dose she fell asleep, and a gentle Sweat came on her: And in about two Hours she awaked, had a Stool, and brought away several Worms of different Sizes. She complained of no Pain, except in her Belly. I now left her, with Directions to give her a Quarter of a Paper of Powder every six Hours; to keep her from getting Cold, and to give her Gruel to drink. She took four Doses of the Powder as above-mentioned, and sweated greatly for thirty Hours, during which Time she had several fetid Stools, and brought off a very great Number of Worms, some dead, but most of them alive. From this Time she began to recover, and in three Weeks was able to walk up a Hill, which a Difficulty of Breathing for six Months before had prevented her from doing. I gave her an Ounce of Elixir Proprietatis, to take some of it Morning and Evening. Her Stomach came to her, and she was perfectly well in five Weeks Time.

London,
May 20, 1754.

SIMON HEAD,
Surgeon of his Majesty's Ship Success.
